"As long as there have been men on the earth, the struggle between man and the underman will be the historic rule: As far back as we can look, the Jewish-led struggle against mankind is part of the natural course of life on our planet. One can be assured that with complete certainty that this struggle for life and death is just as much a law of nature as is the struggle of a pestilent bacillus struggles against a healthy body."

Reichsführer-~~SS~~ Heinrich Himmler 1935

Light and Darkness are eternal enemies, in the same way that night opposes the day — and the greatest enemy of earth's dominant species is man himself.

The underman is a biologically complete creation of nature, with hands, legs, the semblance of a brain, eyes, and a mouth. Although it has similar features, this terrible creature is only partly human, and is spiritually and psychologically lower than any animal.

Inside this being lies a cruel chaos of wild, uninhibited passions, a desire for nameless destruction, the most primitive desires and naked vulgarity.

An Underman—nothing else!

Because everything which has a human face, is not the same.—

Woe to him who forgets this!

Man has conceived, created, completed, contemplated and invented great works, thoughts and art on this earth. For him, there was only one goal: to expand upwards towards a higher existence, to replace the inadequate with something better.

And in this way, culture is grown.

Thus the plow, the tool and the house were created.

He seeks self-preservation in the swamp, in hell; but never in the sun.—

And this underworld of Undermen found their leader: the eternal Jew!

Thy understand and know what they want. They press forward their lowest lusts and desires and unleash horror on humanity.

It all began in historical times with the destruction of the Persians, with the Festival of Purim, the first glorification of organized mass murder. 75000 Aryan Persians fell victim to this Jewish hatred. To this day, Jewry celebrates this horror as their greatest "religious" festival.

The Underman's hate against all bearers of light is eternal. The desert eternally threatens to bring about the downfall of the West.

In the distant steppes, the forces of destruction are eternally clustered together: Attila and Genghis Khan gathered his Huns hordes and raced over Europe, leaving behind a living apocalypse, fire, death, rape, murder and terror, which sank back into the original precipice all light, thousandfold accumulated knowledge, and the powers of progress and human greatness.

"When a nation's leaders are bloodily slaughtered, then physical and mental slavery follows for the state, and in all economic, cultural and intellectual life. We have seen that a nation, robbed by blood mixing of their own values, degenerates and in at most a historically short period of centuries, passes away."

Reichsführer-~~SS~~ Heinrich Himmler 1935

On the endless stretches of the Russian steppes lays Eastern Europe. The cultural split between this giant expanse and Middle Europe is abrupt and sudden. On both sides of this border, we find the same land -- but not the same man!

The man creates the landscape. Therefore on the one hand we see Germany: fertile, full of planned harmonious fields, and well-designed collections of towns; whereas on the other hand there is the impenetrable thicket, the steppe, and the endless wilds and forests, through which the rivers laboriously wind their way.

It is an eternal indictment of the Underman that this fertile, full, black earth -- which could be a paradise, a European California -- is in reality a neglected and desolated. It is a cultural disgrace without precedent. It is a tearful fate of the black earth. --

It is endless, fertile, and neglected -- but blessed with all the treasures of Eastern Europe -- not thoughtlessly removed from the other side of the continent, but brutally separated from it by a deliberately created division.

Eastern Europe did not get beyond a certain level of primitiveness. It saw only chaos because it lacked the man, the valuable carrier of culture, the genius, the systemized imposition of peace, and the meaningful ordering of the endless riches and fertility which the soil contains.

This land knew only of the forces of uncontrolled overexploitation and the

bestiality of war.

Certainly, many upstanding people of Central and Western Europe have held this land during their wanderings. Here once Goths and Varangians founded empires brought culture.

Settlers from the Hanseatic League, Sweden, Flanders, Holland, Swabia and Lower Saxony all tried to bring light into the darkness. For centuries, a cry for help resounded from the other side of the border.

Peter the Great, Catherine II, and many others, called on German peasants and German officers, on European scholars, doctors and engineers -- but time and again, the powers of darkness were victorious, and in a wild animalistic frenzy, pointlessly butchered those who attempted to bring spiritual help.

### The Underman's challenge started with the terrible ride of Attila and Genghis Khan

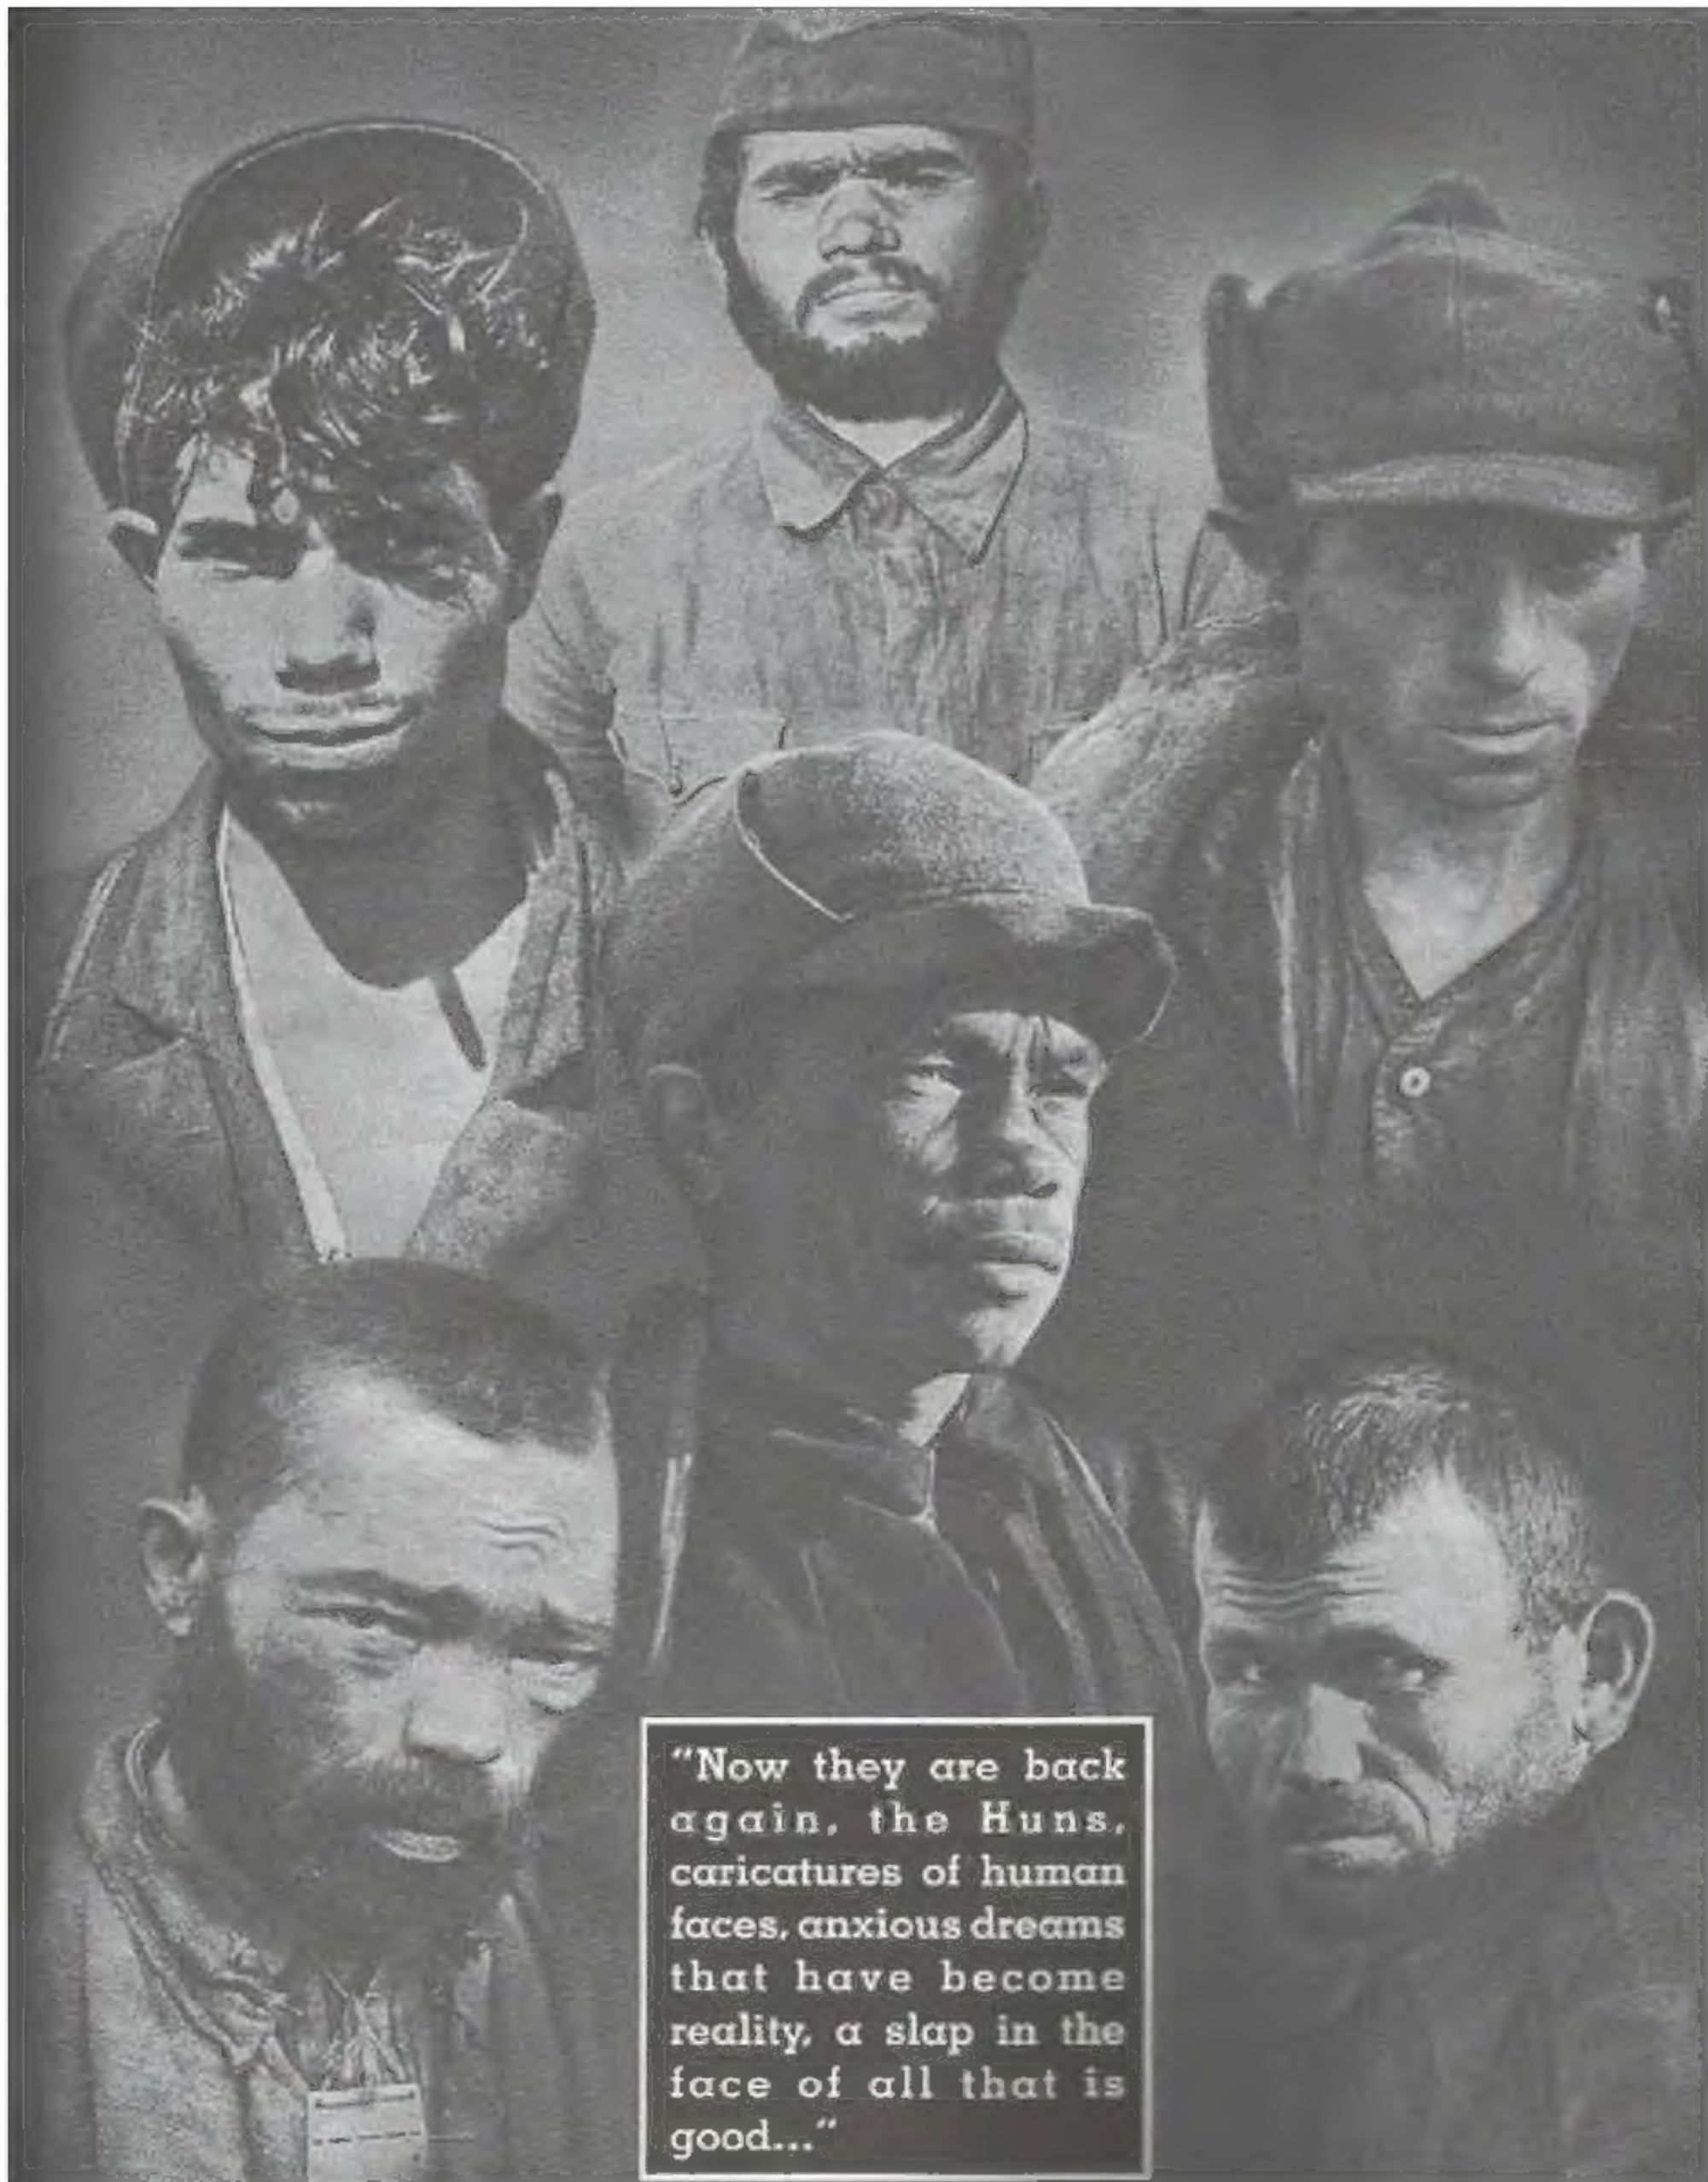

On ugly little steppe horses, almost at one with the fur of their animals, the Hunnish hordes roared against Europe, their slit eyes glowing with murderous lust, and behind them remained only desert, murder, fire and destruction.

The Chroniclers report: The Huns are coming! How many times has this

this cry resounded down through the centuries. Russia became the stamping ground, the place where the Underman's teachings — nihilism and Bolshevism — were born. Again and again an Eastern uprising against the "bourgeois West" was inflamed, enthusiastically endorsed by the Bolshevik rabble. The red poet Peter Oroschkin screamed in one of his writings:

"The Holy Mother earth trembles under tramping of millions of the feet. The Crescent has left the mosque, the Cross has left the Church. The

"Now they are back again, the Huns, caricatures of human faces, anxious dreams that have become reality, a slap in the face of all that is good..."

"...allied with jungle creatures and the scum of the world, but appropriate tools in the hands of the Eternal Jew, the master of organized mass murder, camouflaged only for the stupid in civilian dress."

"God—that is folly and cowardice. God means tyranny and misery. God is evil. To me it means: Lucifer, Satan! And whoever you are, you are the spirit that turned against the faith of my father's God and the Church," says the Jew.

Because the Jew and the Underman hates all divine things, they have plundered the churches and turned them into factories. It was his greatest satisfaction when these buildings which offended him the most, were blown up.

"Der Untermensch: The Underman" is possibly the Third Reich's most famous, misquoted, and misrepresented publication ever. First issued in 1942 by the SS head office under the direct orders of Heinrich Himmler, "The Underman" has ever since been portrayed as "anti-Slavic," "anti-Russian," and "anti-Jewish." In fact only the third allegation has any truth to it. The "anti-Slavic" and "anti-Russian" claims are merely the product of postwar propaganda, reliant on the fact that almost no one would have the chance to actually read the publication for themselves.

The reason for this was that after the war, the Allied occupying powers in Germany ordered all copies of the publication seized and burned. As a result, only a tiny handful were saved, and it is from one of these very few surviving copies, that this edition has been prepared.

In addition to its rarity, the text has also never been correctly and fully translated into English (until now), a fact which has greatly eased the task of those seeking to distort what it actually says.

Ideologically hostile Jewish propagandists have, for example, engaged in outright forgery and misrepresentation of its contents, while a single translation made by an

ideologically sympathetic postwar publisher suffered from serious grammatical and translation distortion errors. This edition is therefore the very first complete and accurate translation into English of this 52 page oversize booklet.

Far from being anti-Slavic, the reader will see that the SS Head Office publication portrayed Russians as victims of Communism—and then specifically blamed Jews as being behind Communism, and, ideologically speaking, inheritors of a far older, far eastern attack on Europe which had started with Genghis Khan and the Mongols.

Nowhere in the SS book are the Slavic people denigrated, and in fact many of the traditional Slavic nations are mentioned in text and photograph as being part of the greater European family. European nations specifically mentioned in this book include Portugal, Spain, Italy, France, Belgium, the Netherlands, Denmark, Norway, Finland, Italy, Switzerland, Slovakia, Croatia, Greece, Bulgaria, Hungary, and Romania.

The suffering of ordinary Russian people under the Soviet system forms a large focus in this work, and at all times great sympathy is evoked for these victims of Communism: men, women and children alike. Special mention is made of their awful living conditions, inflicted by the Soviet economic collectivization system, and always condemned only as the result of Communism.

In addition, the economics, social structure, art, and even freedom of religion under the Soviet state is dramatically and graphically compared with Germany—and elsewhere in Europe.

Finally, after reviewing numerous Soviet atrocities and Communist secret police torture chambers discovered during the German advance into the Baltic states and the Ukraine, this SS book ends with a dramatic series of photographs showing the murderous intentions of the Soviet state—and a warning that if the European people did not unite and together fight off the attack by the "Jewish-led Underman," then Europe itself would be destroyed.

This high-quality reproduction is not a "photostat" but a fully digitally restored copy taken directly from a rare 1942 original.

This edition contains English inserted in exactly the same position as the original German text, in order to best represent the original meaning.
